

RTI 019

1. *How much did Heritage Tasmania's cadastral boundaries audit cost? (audit commenced in 2016, concluded in 2018)*

A number of staff have been involved in the cadastral audit, working at different levels at different times over a period of around three years as part of their normal duties as employees of Heritage Tasmania. As employees do not log the hours spent on specific activities, the cost of this work cannot be ascertained, as staff performed this work alongside other activities.

2. *How many work hours did HT geospatial coordinator spend working on the audit?*

As above – HT Geospatial Coordinator worked on the audit as part of his normal duties.

3. *How many overtime hours did HIT geospatial coordinator spend working on the audit?*

HT Geospatial Coordinator was not paid for any overtime for hours spent working on the audit.
