# I History

In 1979, the Tasmanian Government appointed a Road Direction Signs Advisory Council to assist the former Department of Main Roads in the production of a new, preferred system of road direction signing throughout the State.

The system chosen was based on a similar scheme implemented in the United Kingdom in 1963, consisting of route identification as well as selected destination name signing.

The aim of introducing a 'new' signing scheme was twofold:

- to upgrade the destination signing throughout the State, particularly on unclassified roads and
- to give all significant roads a route number so that, with the assistance of route numbered road maps, visitors to an area could navigate their journey with ease by simply following particular route numbers, in addition to the usual destination signs giving directions and distances to the various towns, villages, centres of interest, etc.

As mentioned above, the signing scheme is based on the United Kingdom system whereby zones have been created and routes chosen according to their importance to the motorist. The zones have as their boundaries the major highway network, thereby dividing the State into eight zones. The numbering of the zones has no definite pattern but was chosen from adjacent highway route numbers where possible.

To achieve the desired aims, roads were allocated route numbers which were divided into four designations:

- The National Highway: identified by the National Highway Shield.
- 'A' routes: roads considered to be of the greatest importance as the major arterials. In the main, the 'A' routes comprise the present State Highway Network.
- 'B' routes: the remaining important road networks in each zone, such as sub-arterials or roads strategically located so as to form a connecting link between important roads and/or centres of interest.
- 'C' routes: minor roads considered to be of sufficient importance to be included in the route coded network. In the main, 'C' routes are local roads under the control of municipal councils or other government organisations such as Hydro Tasmania and Forestry Tasmania. Generally, these routes provide access to isolated localities, holiday areas or tourist features.

It should be emphasised that this is basically a route numbering system. Consequently, it is possible that a route with a distinct route number may include several different roads and be a combination of both classified and unclassified roads extending through more than one municipality. A route can also be a combination of sealed and unsealed sections of road.

## 2 Updates

After extensive consultation, the route code network was reviewed in 2011 by the Road Route Code Advisory Group. The group includes representatives from: the Department of Primary Industries, Parks, Water and Environment; the Department of Infrastructure Energy and Resources; Local Government Association of Tasmania; Forestry Tasmania; Hydro Tasmania; and Tourism Tasmania. A few route codes were rescinded, due primarily to changed circumstances regarding public access. Several new routes were proposed and are in the process of being evaluated. A small number were identified for change and are also being evaluated.

## 5 List of modified routes with comments

- C101 RIDGLEY TO HIGHCLERE:** Section superseded by B18 when Ridgley Highway constructed.
- C164 RED HILL TO MONTANA:** Preliminary plans show that this route was extended at its southern end along Cheshunt Road east to Meander Road (C167). This involved a short duplex with C166.
- C167 HIGHLAND LAKES ROAD TO MEANDER:** This is one instance where the description still used actually reflects the original planned route, not the current route. According to the 2011 description, C167 ends at Sandy Lane in Meander. However, the preliminary plan shows that the route extended up Sandy Lane to terminate on Cheshunt Road (C166) – which would fit the ‘Montana’ description.
- C201 LYMWOOD TO CURRY:** On RDM1981 shown as Haines Road – Mansons Road loop at Egg Lagoon providing access to Lake Martha Lavinia (Martha Lavinia Beach and Penny’s Lagoon).
- C202 CURRIE TO LYMWOOD VIA NARACOOPA AND YARRA CREEK:** On RDM1981, shown as Browns Road from North Road (B25) at Porky’s Lagoon to Fraser Road. (then listed as C205)
- C203 PEGARAH ROAD (PEGARAH TO NARACOOPA);** On RDM1981 applied to Munro’s Road from North Road (B25) to Fraser Road (then listed as C205)
- C235 CALDER TO TAKONE:** Originally shown on RDM1981 as via Zig Zag Road and West Calder Road. Section of current C235 from Calder to Oldina was numbered C238 as below.
- C249 ZEEHAN TO GRANVILLE HARBOUR:** Originally shown as Granville Harbour Road.
- C313 COLEBROOK TO STONOR:** On preliminary sketches this was extended north at Stonor along Blackgate Road (now C315).
- C315 JERICHO TO MUD WALLS ROAD:** The preliminary maps show C315 as running east from Jericho. Unaware of any road that fits the available map and not sure whether this was speculative or whether the route has completely disappeared. Later allocated to Blackgate Road (Stonor to Mt Seymour).
- C342 SALTWATER CREEK TO GWANDALAN:** On preliminary sketches this was allocated to the short route from Coal Mines Road (C341) to Gwandalan on the Tasman Peninsula. Later allocated to Tunnack to Colebrook.
- C344 FORTESCUE BAY ROAD:** Initial section changed from what was previously Fortescue Road, from Arthur Highway to intersection with Coronation Road.
